CABINET ASSEMBLY SPECIFICATIONS

We know that a well planned home is one that is not only visually stimulating, but functional as well. To ensure that our products and services exceed your expectations, we have added accessories that our competitors don't offer. We understand that furniture quality cabinetry can add beauty to any room in your home.

Our locking mechanism provides a seamless overall appearance which stays true to modern European aesthetics, as opposed to using screws and nails which compromises the look of the piece.

Our interior shelving has safety locking mechanisms which allow them to be easily adjusted by the right parties. Our shelves have a metal banding which not only reinforces them, allow for more storage capabilities, but also has a raised edge that stops unwanted items from rolling.

Boxes: 3/4" MDF plywood sandwich board boxes for superior stability

Because there is no cabinet frame, this offers greater accessibility and more storage abilities for larger objects

Steel legs:
(Toe kicks available for seamless look)

Medium density fiberboard (MDF) coated with lacquered paper finished with a UV treatment on face

BLUM Metabox steel drawer system with soft close extension glides: great solution for commercial and residential applications

Full overlay door: available in a wide range of colors, finishes and designs with high scratch and stain resistance, color stability, and antibacterial properties

Optional poly-chromatic edgebanding

With frameless cabinets, thicker boxes provide stability, and avoids the use of a front frame. By eliminating the front frame, you provide yourself with more usable space

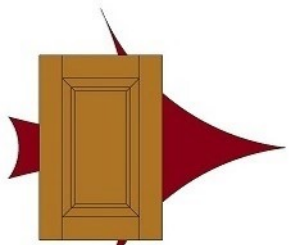

CLIP top BLUMOTION:
With CLIP top BLUMOTION hinges doors close silently. The BLUMOTION soft close feature is built into the hinge cup. These hinges are also equipped with a deactivation switch so even small and light-weight doors close effortlessly

Metal banding:
reinforces shelf while protecting objects from rolling off

Shelf assembly clips:
ensures shelving can be easily adjusted

5mm predrilled holes: used for shelf assembly clips and drawer runners.
